

Attached are three maps in Jpeg format. Map into Vienna speaks for itself. Meet Close up is a closer view of the meeting point. Map to ground continues on from the vienna map and shows where the ground is.

When the bus comes into Vienna, you first pass the airport. Carry on for 15 mins on the motorway. You will pass over a bridge with green metal arches on either side. Then you will pass under two other bridges. The meeting point is about 300 meters after the second. Brian Crowe will be there.

To get to the ground, continue on this road right into the town. You will pass lots of bridges as you drive along the side of the canal. Eventually, you will see a blue painted ship/boat moored permanently in the canal, which is a floating cafe. Get into the left lane. The bridge you want to cross is called Rossauer Bruke, and it is immediately after the Augarten bruke. You can recognise it by the large light brown brick building opposite it on the other side of the canal. On the other side of the bridge, cross straight over and head up towards the church. Drive around the front of the church and follow the road around to the right (around the side of the church). Straight across the lights. You are now in (or should be) the Alser Strasse. Keep going straight and this leads into the Hernalser Hauptstrasse (be careful as the Alser Strasse branches off to the left). The ground is at number 214.

Good luck! Any problems, you can reach me at work on +43 128822 358 or home on +43 1 3329243 or Thomas on his mobile 0043 (0) 664 4425302.
